CLAIMS 1-4, 6, 7, 9, 10, AND 13-37 ARE PRESENTED
FOR EXAMINATION

Applicant's election without traverse of Group I, claims 2 and 9 in Paper No. 18 is acknowledged.

Further restriction is required.

Applicants' claims are drawn to the treatment of bone with a non-estrogenic agent. The claims to be examined will be 2, and 9 since claim 5 has been canceled.

A careful reading of the specification teaches the administration of an astronomical number of compounds classified throughout classes 514 and 424 which have established separate and distinct status in the pharmaceutical art. The claims to be examined read on a broad class of compounds under the phrase "non-estrogenic agents". For example applicants specification teaches non-estrogenic agents as, bisphosphonates, classified in class 514, subclass 108; teriparatide amino acid fragments classified in class 513, subclass 12+; calcium preparations classified in class 424, subclass 422, etc.

An undue burden will be placed on the examiner in the search of the patent literature since a search, as exemplified above, has to be conducted in both the organic in addition to the inorganic arts. This is further illustrative that the claims are separate and distinct.

Art Unit: 1617

It would be helpful in the search if applicants provide the examiner with compounds within the class and subclass which is to be searched. e.g., bisphosphonates, Vitamin D , parathyroid hormone

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Further restriction may be required.
